Project Name

eSchool/eCollege/vAcademy Website

Introduction

This proposal is just a “proposal.” Nothing is final or binding until it is signed. Everything contained herein is open to negotiation. Pricing matters shall be discussed once the required functions are finalized

We encourage the discussions on this proposal. We will be more than happy to address to your questions, comments or concerns over the proposal.

Thank you in advance for taking the time to review our proposal. We truly appreciate the opportunity to earn your business and are prepared to do whatever it takes to do so!

Overview

The primary objective is to develop and build a eSchool/eColledge/vAcademy Website System for eSchool/eColledge/vAcademy agents This is not 100% customized solution rather its a Turnkey solution with predefined standard functions.

What is Included (“Scope of work”)

A complete, fully tested, optimized and web based Multi User eSchool/eColledge/vAcademy Website System.

Said Proposal is for eSchool/eColledge/vAcademy Website System which basic purpose is to keep it best possible level simplified so that at user level no specific IT expertise needed to operate it making it easy to operate and cost effective being in operation.

Features

This software have more than 100+ features, modules, activities

Have ability to meet all sort of colleges, schools and Academies to have ePresence even run them totally virtually.

This is, online Learning Management system enabling educators to create their own private website filled with dynamic courses that extend learning, any time, anywhere.

Whether you're a teacher, student or administrator, Moodle can meet your needs. it's extremely customisable core comes with many standard features.

General Features

Modern, easy to use interface

Designed to be responsive and accessible, the Moodle interface is easy to navigate on both desktop and mobile devices.

Personalised Dashboard

Organise and display courses the way you want, and view at a glance current tasks and messages.

Collaborative tools and activities

Work and learn together in forums, wikis, glossaries, database activities, and much more.

Activities

All-in-one calendar

calendar tool helps you keep track of your academic or company calendar, course deadlines, group meetings, and other personal events.

Calendar

Convenient file management

Drop and drop files from cloud storage services including MS Skydrive, Dropbox and Google Drive.

Working with files

Simple and intuitive text editor

Format text and conveniently add media and images with an editor that works across all web browsers and devices.

Text editor

Notifications

When enabled, users can receive automatic alerts on new assignments and deadlines, forum posts and also send private messages to one another.

Messaging

Track progress

Educators and learners can track progress and completion with an array of options for tracking individual activities or resources and at course level.

Tracking progress

Administrative Features

Customisable site design and layout

Easily customise a theme with your logo, colour schemes and much more - or simply design your own theme.

Themes

Secure authentication and mass enrolment

Over 50 authentication and enrolment options to add and enrol users to your Moodle site and courses.

Authentication / Enrolment

Multilingual capability

Allow users to view course content and learn in their own language, or set it up for multilingual users and organisations.

Language

Bulk course creation and easy backup

Add courses in bulk, back up and restore large courses with ease.

Manage user roles and permissions

Address security concerns by defining roles to specify and manage user access.

Roles and permissions

Supports open standards

Readily import and export IMS-LTI, SCORM courses and more into

SCORM / External tool

High interoperability

Freely integrate external applications and content or create your own plugin for custom integrations.

Standards

Simple add-ons and plugin management

Install and disable add-ons and plugins within a single admin interface.

Installing add-ons

Regular security updates

regularly updated with the latest security patches to help ensure your site is secure.

Security

Course Development and Management Features

Direct learning paths

Design and manage courses to meet various requirements. Classes can be instructor-led, self-paced, blended or entirely online.

Pedagogy

Encourage collaboration

Built-in collaborative publishing features foster engagement and encourage content-driven collaboration.

Activities

Embed external resources

Teach materials and include assignments from other sites and connect to the gradebook

Multimedia Integration

Moodle's built-in media support enables you to easily search for and insert video and audio files in your courses.

Working with media

Group management

Group learners to share courses, differentiate activities and facilitate team work.

Groups

Marking workflow

Conveniently assign different markers to assignments, manage grade moderation and control when marks are released to individual learners.

In-line marking

Easily review and provide in-line feedback by annotating on PDF files directly within browser.

Assignment module

Peer and self assessment

Built-in activities such as workshops and surveys encourages learners to view, grade and assess their own and other course members' work as a group.

Integrated Badges

Fully compatible with Mozilla Open Badges, motivate learners and reward participation and achievement with customised Badges.

Badges

Outcomes and rubrics

Select from advanced grading methods to tailor the gradebook to your course and examination criteria.

Security and privacy

Teach and share in a private space only you and your class can access.

Courses

Activities

An activity is a general name for a group of features in a course. Usually an activity is something that a student will do that interacts with other students and or the teacher.

There are 14 different types of activities in the standard software that can be found when the editing is turned on and the link 'Add an activity or resource' is clicked. And 20+ premium activities also available.

Assignments

Enable teachers to grade and give comments on uploaded files and assignments created on and off line

Chat

Allows participants to have a real-time synchronous discussion

Choice

A teacher asks a question and specifies a choice of multiple responses

Database

Enables participants to create, maintain and search a bank of record entries

External tool

Allows participants to interact with LTI compliant learning resources and activities on other web sites.

Feedback

For creating and conducting surveys to collect feedback

Forum

Allows participants to have asynchronous discussions

Glossary

Enables participants to create and maintain a list of definitions, like a dictionary

Lesson

For delivering content in flexible ways

Quiz

Allows the teacher to design and set quiz tests, which may be automatically marked and feedback and/or to correct answers shown

SCORM

Enables SCORM packages to be included as course content

Survey

For gathering data from students to help teachers learn about their class and reflect on their own teaching

Wiki

A collection of web pages that anyone can add to or edit

Workshop

Enables peer assessment

and 20+ more Activities

Question 3

We decide who gets in and does what in our courses

...and for that reason we have roles:

Admin can do, see & edit anything on the site

Teacher can do, see & edit anything in their course

Student can do, see & edit in course as assigned by teacher

Guest can only look in to parts allowed

Permissions for **parent** or any **other** role can be specified...

What is a Grouping...?

A grouping is a
collection of groups

A grouping helps you **organize multiple groups** you might use in your course

You can **assign an activity to a particular grouping** depending on what kind or size of groups you want to use

When to use Groupings...?

To assign different-sized groups depending on the type of activity

To teach a multi-section course in a single course
(Using separate group mode as the default course setting)

To create an assignment for only part of the class, leaving out the rest

Using wikis in teaching and learning

- ☒ Display points for each level during evaluation
- ☒ Display points for each level to those being graded
- ☒ Allow grader to add text remarks for each criterion
- ☒ Show remarks to those being graded

Basic Methodology

Throughout Design, Develop and Implementation Process core Conceptual concept will remain in mind to keep operational system simplified upto maximum possible level so that operating said does not require any technical knowledge.

All Complexities of operational and conceptual procedures will be delt by the software internal algorithm. Keeping it simple for operator. For its operation any body who can play with computer can operate the Software.

Technology and Compatibility

Note: if all the jargon below is Greek to you, just know that it basically means that we will develop the Software to conform with all of today's technology standards.

Development Media	:	PHP,XML,
Database	:	mySQL

Timelines and Milestones

Our *tentative* production schedule proposed is as follows. However, please realize that these are NOT deadlines. If you require a specific launch date or other sorts of deadlines, we are happy to oblige given enough advance notice. Otherwise, we prefer to estimate the timeframes but ultimately take the amount of time that is needed for the best results. While we don't bill you by the hour, our costs are based on the amount of time we invest into each project. So rest assured that we have a very vested interest in moving quickly.

(Note that the days are measured in business days, starting from the day the project begin by receiving down payment and initial data required to take start.)

Basic Core development	4 Weeks
First Implantation and Testing at Client Site	4 Weeks
Fine tuned Final Version Handover	1 Weeks

Fees & Payment

Please go through details covered in this proposal. It would be easy for us to settle down the cost of the project when requirements are completeley discussed by both parties.

Important Notes/Points:

- Simply providing of Binaries. Source code will remain the property of the Intelligent Business Solution and will never be handed over what so ever the case may be.
- This proposal is designed keeping in mind that this site would be support site not the school main site. If you want to have it school main site we can send u revised reworked proposed model.
- As we can not share source code so hosting will be remain under our charge and we shall provide. What sort of hosting account needed depend upon

- 1 Number of total Users
- 2 Number of user using site at same time
- 3 nature and volume of data
- 4 Backend webapplication required initial dedicated RAM

- Cost Structure

In order to give you idea of web application cost structure it would have following components

- initial Setup Fee
- Monthly charges
- Training Charges
-

We really appreciate for your time and energies you have spend for going through this comprehensive proposal. If you need any further information, details it would be our p[leasure to provide you the same.

Hoping to hear from you soon and a proper detailed meeting time so that we can discuss your needs and can show how this application can full fill your needs.

Assuring you best of our services and looking forward to have good future business relationships.

Regards.
